## Introduction

This document contains details of the London Stock Exchange fees for both United Kingdom incorporated companies and overseas incorporated ('international') companies issuing securities in London.

**Admission fees** are payable on all applications for securities to be admitted to trading on the London Stock Exchange, based on the market capitalisation of those securities at admission. An invoice for the admission fee will be raised at that time. Payment of admission fees must be received **no later than 30 days after the date of such invoice**. Two different fee scales are applied for admission fees – one for new companies joining the market and the other for further issues of securities by companies already admitted. Companies subject to a reverse takeover pay admission fees according to the new company scale. Companies which are readmitted following restructuring pay at the further issue rate.

In the event of an application being made whereby more than one class of security is being admitted, a separate fee will be charged for each class of security.

## Chargeable and non-chargeable applications

**Annual fees** are payable by all companies which have either equity securities or certificates representing shares admitted to trading. Annual fees are billed in the first week of April for the 12 months commencing 1 April and are collected by direct debit. A pro-rata portion of the annual fee is payable by all issuers of equity securities and certificates representing shares when commencing trading on the Exchange for the first time part way through the year.

The annual fee is for each year or part thereof and is therefore not refundable, including where securities cease to be traded.

No pro-rata annual fee is payable in the year of transfer in respect of companies transferring from AIM™ to the Main Market.

No additional annual fee is payable by a company admitted to trading as a result of a reverse takeover or a readmission.

**Note:**

Issuers of equity securities (including certificates representing shares) incorporated outside the United Kingdom that are admitted to trading on the Domestic Equity Market (SETS™/SETSmm™/SEAQ™ trading services) are subject to charges at UK rates.

Definitions of terms used in this publication are included in the Admission and Disclosure Standards.

## Calculating market capitalisation for admission fees

### Equity securities (including certificates representing shares)

Multiply the number of securities for which application is being made by the opening price on the day of admission to calculate the market capitalisation.

### Fixed income, floating rate securities and international debt securities

Multiply the number of securities for which application is being made by the issue price of the securities.

### Exchange rates

For securities denominated in a currency other than pounds sterling, the market capitalisation must be converted into pounds sterling at the exchange rate printed in Monday's edition of the Financial Times 'FT guide to world currencies', immediately prior to the date of admission. The rate advised in this edition will be used for all currency conversions during that week.
